

# RESEARCH OPPORTUNITY

## Childhood Anxiety in Fragile X Syndrome and Autism

We are recruiting children with autism spectrum disorder  
who are 7-11 years old

### Who can Participate?

Children with autism who are  
7 to 11 years old

### Participation Entails:

One in-person behavioral  
assessment in your home or at  
our lab (~3 hours)

Parent-report questionnaires and  
interviews (~3 hours)

Assessments are scheduled based  
on your availability

### Study Purpose:

This study aims to better  
understand:

How, when, and why anxiety  
develops in some children with  
autism

How anxiety impacts broader  
abilities (e.g., social skills) and  
quality of life

Families will receive  
**\$200**  
for participation
